

NexusACO® frequently asked questions.

UnitedHealthcare and Arizona Care Network (ACN) are working together to provide a patient-centered health plan that helps promote better health and lower costs. Below you'll find answers to questions you may have about the plan.

How is NexusACO different from other products?

What makes NexusACO different is how UnitedHealthcare is able to harness its sophisticated data and technology to identify and collaborate with high-performing ACOs to help deliver greater efficiencies and outcome-based results.

Why is it important to consider this product now?

The plan's patient-centered care approach helps guide your employees through the complex health care system so they can get to the right provider for the right care at the right time. A variety of plan designs lets employers strike the right balance between controlling costs and meeting employee health care needs.

How does the cost of NexusACO compare to other products?

We expect NexusACO will cost less. The plan's focus on primary care, prior authorization and specialist referrals for medical necessities may lead to more efficient use of specialty care. Additionally, primary care physicians (PCPs) who have a consistent relationship with patients and know their medical history can help provide faster, more cost-effective care.

How to choose a PCP?

To guide your employees with their health care, they will need to select a Tier 1 PCP during open enrollment. One PCP can be selected for the entire family, or each covered family member may select his or her own PCP from the ACN and affiliated physician groups.

Look for the Tier 1 network symbol — Spot the Dot.

Where your employees go for care can make a difference in what they pay. Tier 1 providers are doctors, hospitals and other health care providers who may offer the greatest value for their health care benefits. Look for the **Tier 1 network symbol**  on myuhc.com®.

The NexusACO plan is available in Maricopa and Pinal counties.

The Tier 1 network includes the following Arizona Care Network physician groups:

- Dignity Health physicians
- Abrazo physicians
- Phoenix Children's Care Network
- Other quality primary and specialty care physicians

Can employees change their PCP?

PCP changes can be made once a month and are effective the first of the following month. Change requests can be submitted on or before the last day of the month. Changes can be made by calling the toll-free number on their health plan ID card or by signing in to myuhc.com.

What other resources and tools are included with NexusACO?

- myuhc.com provides access to benefit information, tools and programs to help your employees keep their health on track.
- Virtual Visits provide access to online doctor visits—anytime, anywhere.
- Disease management programs offer support and resources to help manage chronic conditions, such as diabetes and asthma.
- Behavioral health benefits assure your employees that they have support in difficult situations.

Who should employees call if they have questions?

If employees don't have access to the internet, need translation services or have questions, they can call the toll-free phone number on their health plan ID card.

Is a referral needed before seeing a specialist?

Online referrals may be required. If a member's ID card includes the "Referrals Required" reference, they will need to obtain an online referral **before** seeing a specialist.

What if an employee needs to go to the hospital?

Employees enrolled in NexusACO should talk to their doctor first to determine which hospital can meet their medical or surgical needs. The employee or their doctor may be required to notify UnitedHealthcare before they're admitted.

How can NexusACO help lower employer costs and increase employee savings?

The key to this framework is connecting the outcome-based results of high-performing providers, the better employee experience of having a PCP to "quarterback" their care and the incentive of a national network tiered on results and cost efficiencies to help deliver employer savings.

How do physicians know which patients are covered by NexusACO plans?

Physicians and/or their offices may check employee eligibility, benefits, etc. on uhcprovider.com, or they can call the number on the health plan ID card.

Learn more.

Visit uhc.com/aznexus or call your UnitedHealthcare representative with questions.

Tier 1 providers may be subject to change, visit myuhc.com® for the most current information or call the number on your health plan ID card.

Virtual Visits are not an insurance product, health care provider or a health plan. Unless otherwise required, benefits are available only when services are delivered through a Designated Virtual Network Provider. Virtual Visits are not intended to address emergency or life-threatening medical conditions and should not be used in those circumstances. Services may not be available at all times or in all locations.

Disease Management programs and services may vary on a location-by-location basis and are subject to change with written notice. UnitedHealthcare does not guarantee availability of programs in all service areas and provider participation may vary. Certain items may be excluded from coverage and other requirements or restrictions may apply. If you select a new provider or are assigned to a provider who does not participate in the Disease Management program, your participation in the program will be terminated. Self-Funded or Self-Insured Plans (ASO) covered persons may have an additional premium cost. Please check with your employer.
