

Script B2B Video – Doctors Plan of Arizona

When it comes to choosing a health plan, you have options.

That's why we want you to know that Doctors Plan from UnitedHealthcare is designed with savings in mind.

Helping your employees build stronger connections with their primary care physician works to help make their health plan experience better — and your bottom line lighter.

This plan offers employees a wide range of quality care options - including access to many different primary care physicians, or PCPs. A PCP can guide them to quality, patient-centered care and optimal health. That could mean lower expenses and increased annual savings for you.

And a smaller, focused network may help to deliver lower administrative costs. You can learn more by visiting the plan's dedicated website.

Additional coverage and benefits support efficient use of services and allow your employees to access care more easily.

Doctors Plan encourages cost sharing with annual deductibles and out-of-pocket limits.

A streamlined experience means greater convenience.

With Doctors Plan you're able to balance cost savings with flexible plan design.

We help make it easier for employees to understand and use their plan - so you may not have to spend time explaining it. Plus, employees can easily access health plan information and resources online.

Need quality care? You got it. With flexible options for added accessibility, your employees have choices for where, when, and how to meet with their care providers.
